

The windmill at Windmill Hill
Transformed from a neglected ruin to a working mill

Presentations for group meetings

Lively and informative, fully illustrated with photographs and short video clips, this presentation tells the story of the transformation of the windmill at Windmill Hill from a neglected ruin to an operating windmill. The talk lasts for about 45 minutes and we will then answer as many questions as you have time for! We bring our own lap-top and projector and can also bring a screen if you do not have a suitable surface for projecting images.

We ask for a donation of £50 plus travel costs @ 30pence per mile.

Group visits to the windmill

We can arrange a private visit to the windmill for your group. Commencing with an introductory film lasting 25 minutes, your members will then have a guided tour of the three floors of the windmill to learn about the work of the miller and to see how the machinery works. For any of your members who are unable to climb the stairs we can offer a virtual tour which can be viewed on the ground floor. Typically a visit will last 90 minutes. Although we cannot offer refreshments there are pubs and tearooms very close to the mill.

We ask for a donation of £50 for group visits of up to 15 people.
